

OLES DIDUKH

Senior Front-End Engineer

Location: Vinnytsia, Ukraine | **Email:** oles.didukh@gmail.com | **Phone:** +38 067 88 99 570 |

Portfolio: olesdidukh.dev | **LinkedIn:** linkedin.com/in/oles-didukh

PROFESSIONAL SUMMARY

As a results-driven Senior Front-End Engineer, I bring over 7 years of experience in developing high-performance, scalable web applications. My expertise lies in modern front-end technologies such as JavaScript, TypeScript, React, Next.js, and responsive design. I have a proven track record of creating exceptional user experiences, improving application performance, and implementing complex UI features that serve enterprise-level clients. I specialize in building intuitive interfaces with a strong focus on clean code, testing, and agile methodologies.

TECHNICAL SKILLS

Languages: JavaScript (Expert), TypeScript (Advanced), HTML5 (Expert), CSS3 (Expert), SASS/SCSS (Expert)

Frameworks & Libraries: React.js (Expert), Next.js (Advanced), Redux Toolkit (Advanced), Zustand (Advanced), React Native (Intermediate)

UI/UX: Material-UI (MUI), Tailwind CSS, Styled Components, Storybook, Responsive Design, Mobile-First Development, Cross-Browser Compatibility

Build Tools & Testing: Webpack (Intermediate), Vite (Intermediate), Jest (Intermediate), React Testing Library, Cypress, ESLint, Prettier

Performance: Web Performance Optimization, Lighthouse, Web Vitals, Code Splitting, Lazy Loading, Bundle Optimization

Version Control & Deployment: Git (Advanced), GitHub Actions, CI/CD Pipelines, Vercel, Netlify

Development Tools: npm/yarn, Chrome DevTools, Postman, Figma, RESTful API Integration

Methodologies: Agile (Scrum, Kanban), Test-Driven Development (TDD), Code Reviews, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Senior Front-End Engineer

April 2024 - July 2025

Safebooks AI | Remote

- At Safebooks AI, I architected and developed a real-time financial monitoring dashboard using Next.js 14, React 18, TypeScript, and Zustand. This dashboard, with its 99.9% uptime, serves 9 enterprise clients, providing them with a seamless and reliable financial monitoring experience.
- Implemented complex data visualization components and interactive charts for AI-driven anomaly detection, improving user engagement by 35%
- Integrated RESTful APIs for seamless data flow between front-end React components and backend services, handling 10,000+ daily transactions
- Optimized application performance using Webpack bundling and code splitting, achieving 95+ Lighthouse scores and a 50% reduction in initial load time
- Developed a comprehensive front-end test suite using Jest and React Testing Library, achieving 85% code coverage and reducing UI bugs by 60%
- Led front-end architecture decisions and collaborated with cross-functional teams using Agile/Scrum methodology

Technologies: Next.js, React, TypeScript, Zustand, Material-UI, Vite, Jest, Webpack, RESTful APIs, Git

Senior Front-End Developer

May 2021 - January 2024

Emerline | Vinnytsia, Ukraine

- At Emerline, I led the front-end architecture for an enterprise internal platform serving 1,000+ employees. Through my leadership, we improved productivity metrics by 30% with an intuitive UI/UX design, demonstrating my ability to drive significant improvements within a team.
- Designed a scalable component library using React, TypeScript, and Storybook, reducing development time by 40% across 3 product teams
- Guided and mentored two junior developers on React best practices, code quality standards, and modern JavaScript ES6+ features, fostering their growth and contributing to the team's success.
- Implemented performance monitoring using Web Vitals and Google Analytics, identifying and resolving bottlenecks that improved Core Web Vitals by 35%

Technologies: React, TypeScript, React Native, Redux, JavaScript ES6+, SASS, Webpack, Git, RESTful APIs, Agile/Scrum

Middle Front-End Developer

March 2019 - April 2021

Inango Systems | Vinnytsia, Ukraine

- Enhanced web platform for a primary Internet Service Provider using React.js and Redux, improving user experience metrics by 25% for 50,000+ customers
- Successfully migrated legacy jQuery application to modern React.js architecture, resulting in 40% performance improvement and 50% reduction in maintenance time.
- Developed an MVP mobile application using React Native, delivering the project 2 weeks ahead of schedule
- Implemented responsive design principles and cross-browser compatibility, ensuring consistent experience across 15+ device types
- Collaborated with backend team to design and implement RESTful API integrations, reducing front-end loading time by 30%

Technologies: React.js, Redux, React Native, JavaScript, jQuery, HTML5, CSS3, RESTful APIs, Git, Webpack

Junior Front-End Developer

June 2018 - February 2019

Helios Technologies | Vinnytsia, Ukraine

- Developed responsive web interfaces using HTML5, CSS3, JavaScript, and React.js for 5 client projects
- Implemented pixel-perfect designs from Figma mockups, achieving 100% design accuracy
- Participated in code reviews and adopted best practices for clean, maintainable code
- Learned and applied version control workflows using Git and GitHub

Technologies: HTML5, CSS3, JavaScript, React.js, Git, Responsive Design, Figma

EDUCATION

UNIT Factory (Ukrainian National IT Factory)

École 42 Network | Kyiv, Ukraine | 2017 - 2019

- Selected from 13,000+ applicants to join Ukraine's only programming school based on innovative French École 42 methodology
- Completed intensive peer-to-peer (P2P) project-based curriculum with no teachers or traditional grades
- Mastered C/C++, algorithms, data structures, and system programming through 20+ practical projects
- Developed strong problem-solving and self-learning abilities in a 24/7 collaborative environment
- Completed "Piscine" - rigorous one-month selection bootcamp with 60+ hour weeks

Master's Degree in Physics

Taras Shevchenko University of Kyiv | 2016 - 2018

- Relevant Coursework: Computational Physics, Data Analysis, Algorithms, Quantum Mechanics
- Thesis: "Thermal conductivity in silicon nanowires measured by Raman spectroscopy"
- Co-authored three peer-reviewed scientific publications
- Parallel studies with UNIT Factory, successfully transitioning from physics to software engineering
