Senior Front-End Engineer with 7+ years of experience designing, building, and optimizing enterprise web applications. Expert in React, Next.js, and advanced TypeScript. Demonstrated success in migrating legacy systems, architecting high-frequency data dashboards, and accelerating project delivery times. Combines deep technical expertise with efficient custom tooling workflows to deliver secure, accessible, and pixel-perfect digital experiences consistently.

TECHNICAL SKILLS

- **Languages:** JavaScript (Expert), TypeScript (Advanced), HTML5, CSS3, SASS/SCSS (Expert).
- **Frameworks & State Management:** React.js (Expert), Next.js (Advanced), Redux, Zustand, React Native.
- **Databases & API Integration:** RESTful API architecture, SQL, and NoSQL database management
- **UI/UX & Design Systems:** Material-UI, Tailwind CSS, Storybook (Component Library Architecture), Responsive Design, Mobile-First, Cross-Browser Compatibility.
- **Testing & Tools:** Jest, Cypress, Webpack, Vite, Web Vitals, Lighthouse, Git, CI/CD.

PROFESSIONAL EXPERIENCE

Senior Front-End Engineer | Safebooks AI | Remote | Apr 2024 - Jul 2025

- Architected Next.js/React financial governance platform processing 1M+ daily transactions, reducing manual data reconciliation by 40%.
- Engineered a real-time anomaly detection dashboard visualizing 50,000+ data points with sub-200ms render times.
- Built type-safe data pipelines using advanced TypeScript Generics, reducing runtime errors by 95% and saving ~15 QA hours per sprint.

Senior Front-End Developer | Emerline | Remote | May 2021 - Jan 2024

- Led front-end architecture for complex enterprise portals, delivering 3 major client apps under budget and increasing retention by 20%.
- Deployed a white-label React/Storybook component library adopted by 5 teams, cutting UI dev time by 30%.
- Streamlined Developer Experience workflows through custom tooling, reducing onboarding time by 50%.

Middle Front-End Developer | Inango Systems | Kyiv, Ukraine | Mar 2019 - Apr 2021

- Developed real-time ISP network UIs monitoring 10,000+ nodes, improving client incident response by 35%.
- Migrated legacy portals to modern React/Redux architectures, eliminating frame drops and boosting Lighthouse scores to 92.
- Integrated front-end architectures with robust SQL/NoSQL backend systems, cutting client-side parsing overhead by 25%.

Junior Front-End Developer | Helios Technologies | Kyiv, Ukraine | Jun 2018 - Feb 2019

- Developed responsive interfaces for 5 client projects, implementing pixel-perfect Figma designs.

EDUCATION

UNIT Factory (École 42 Network) | Kyiv, Ukraine | 2017 - 2019

- Selected from 13,000+ applicants for peer-to-peer programming education.
- Mastered C/C++, algorithms, and data structures through 20+ practical projects.

Master's Degree in Physics | Taras Shevchenko University of Kyiv | 2016 - 2018

- Specialized in Computational Physics and Data Analysis, developing the advanced analytical and quantitative problem-solving skills essential for complex software engineering.
- Co-authored 3 scientific publications.
